My professional career in recent years is oriented towards performance and professional football both male and female, I would join an international project with a goal of training young female or male athletes with a high level of performance.

My strengths in which I have extensive experience and training are the programming and planning of physical, technical and tactical training integrated at an early age that assists the evolutionary processes and the level of maturation of young people. Sessions of programming of knowledge and capacities for the technical and tactical development of the player. Fundamentals of evolutionary psychology and pedagogy applied to sports training. Group management and motivational activities. Human Resources Management with 13 years of experience in sports center management. Knowledge and management of sports management programs Gedespro, Easy Coach, Nacsport. Biomechanical analysis of the management programs of Kinovea, Va-express ...
